Dear Parent/Carer

Future Generations Project – Learning Curve

As you may be aware, we are running an exciting, innovative and unique schools-led employer engagement project across four Outwood schools in the Tees Valley this year, called 'Future Generation' and you can read more here: www.bydales.outwood.com/blog/news/1690. We have over 100 employers keen to work with our students to promote greater understanding and aspirations towards key employment sectors. We have developed bespoke profiling software to encourage students to link with employers from areas they perhaps might not have considered.

Following on from your son/daughter's initial profiling computer questionnaire, they have been matched and selected to attend the below employer session:

Learning Curve - Monday 5 June 2.30pm in H3

Session overview: Learning Curve Group specialises in education and training that supports the needs of three client groups; FE providers, employers and learners. At this session, students will gain an insight into Learning Curve, the range of careers opportunities available and what the day to day responsibilities entail.

Although this particular career area may not currently be an exact area of your child's interest, we believe early contact with employers and finding out about a range of career sectors and opportunities will allow students to learn about and develop employability skills, in order to make a more informed decision about their future and post 16 options.

Yours faithfully

Sarah Wing
LRC Manager
